For 15 years, we have been working to develop innovative and technical products of decoration.
All this to be able to propose you accessible solutions for decoration and internal design projects.
Since the very beginning, besides technicity and quality, creating fine and inspiring colours has been an important and integral part of our brand history.

Forerunners on the emerging market of the "BÉTONS CIRÉS" (layered polished concrete), our collections helped the concrete to leave its greyness beyond.

Our colour charts are imagined to satisfy any decorative desire and match every environment.
From neutral tones to strong and daring colors, guided by a boundless inspiration, we are happy to present you the comprehensive colour chart for our various ranges : Micro-topping Concretes, Decorative Paints, PURE® Métal, and Lime products.

Follow us!

NOTA BENE :
Shades and aspects in our colour chart are indicative and cannot be considered as contractual. When making your choice we advise to use our samples and our hand painted colour charts.

Micro Topping Concretes

	ENDUIT BÉTON COLORÉ - EBC	PURE® Minéral Béton - PMB
DESCRIPTION	Decorative finishing mortar, coloured in its mass.	Decorative coating made from cement, lime and mineral fillers.
AESTHECTIC RENDER	Textured or uniform depending on gestures at application..	Slightly nuanced, color chart with softened shades.
TECHNICAL PROPERTIES	Exceptional grip on the majority of surfaces. Waterproofing properties.	Thin grain. A soft and smooth texture and a longer application time facilitate the application.
IDEAL FOR...	Indoors/outdoors, floors, walls, counters, wash-basins, Italian showers, bathrooms.	Indoor : wall, Italian shower, countertop, wash-basins, bathroom.
APPLICATION AREA*	• Applied in 2 to 3 layers of small thickness on any surface: tiles, cement, plasterboards, aerated concrete... • Suitable for low temperature heated floors. • For high-traffic areas, choose the Self-leveling Floor INDUX - RBX®. • Usually applied in 1 to 2 mm.	• Applied in 2 or 3 layers on the surface after preparation (plaster, old tiles, cellular concrete, cement, wooden derivatives...). • Can be used either on new or old surfaces. • Apply on a thickness from 1mm (decorative wall) to 2mm (technical room).

Concrete Look Seamless Floors

	SELF-SMOOTHING FLOOR / SOLIX - SC+	SELF-LEVELING FLOOR / INDUX - RBX®
DESCRIPTION	Self-smoothing mortar, fusion of cement, self-spreading resins and admixtures.	Self-leveling mortar, already coloured in its mass, fusion of cement and mineral fillers.
AESTHECTIC RENDER	Tight and silken aspect, very fine grain.	Crude mineral aspect but smoothen surface, open space and industrial spirit.
TECHNICAL PROPERTIES	Decorative properties and unique finish.	Rich in mineral fillers, strong resistance to wear. Ideal for high-traffic areas.
IDEAL FOR...	Interior floors of vast areas.	Interior floors of vast areas.
APPLICATION AREA*	• Applied in 1 go on any regular surface: concrete/ cement screeds, fiber screed and existing tiles (in this case contact us). • Suitable for low temperature heated floors. • Applied in 4 to 10 mm of thickness. • May be applied on anhydrite screeds.	• Applied in 1 go on any regular surface : concrete/ cement screeds, fiber screed and existing tiles (in this case contact us). • Suitable for low temperature heated floors. • Applied in 4 to 15 mm of thickness. • May be applied on anhydrite screeds after special preparation.
